

## EXPRESSIONS OF INTEREST ELECTRICAL WORKS

The Vanuatu Broadcasting & Television Corporation invites *Expressions of Interest* from organisations with the technical expertise and capacity to upgrade the electrical infrastructure at Broadcasting Haus in Port Vila. The existing electrical system is the product of decades of multiple contractors and varying standards. What we require is an overall refurbishment for longevity and compliance with international standards.

Recently, VBTC undertook selected emergency electrical upgrades including installation of new stand-by gensets, switchboard with main breakers and replacement of RCD breakers on several distribution boards. We envisage that the major works under this EOI will include the following:

- Assessment of the current electrical system
- Re-wiring of electrical cables and associated accessories
- Further upgrade of the main switchboard
- Upgrade of distribution boards
- Surge protection
- Earthing
- Lightning protection

We recognise that the electrical upgrade sought under this EOI will be extensive and may require wholesale replacement of the existing electrical system. Given the exigencies of our broadcasting services during the current pandemic, any EOI must include a methodology that ensures no broadcasting service is disrupted during the electrical upgrade.

Your EOI must outline the following:

- Company profile
- Professional competency for this work
- testimonials
- a detailed workplan
- timeframe
- pricing

To assist you prepare your EOI, an on-site inspection is planned for **Monday February 7<sup>th</sup>, 2022 at 10am** for all interested parties. For details please contact Warren Roberts on Mob: 7109401 or email [robertw@vbtc.vu](mailto:robertw@vbtc.vu).

**Please note that the deadline for submission is 4pm Friday February 18, 2022.** No late submissions will be considered.
